

Precise. Delicate. Methodical. Creative. These are the four words that can describe my way of being and working. I am Fabio Meriano and I am a Visual Designer.

My role is to communicate through images. I chose to follow this path to touch the hearts of those who observe my work, exciting and fascinating them at the same time.

My five years of education at the Rome University of Fine Arts allowed me to develop my eye and hand to perform the role of art direction in various fields: type design, motion graphics, information design, and advertising. In addition, it allowed me to develop my teamwork and communication skills, thanks to the extensive team projects carried out during various courses.

I am always ready to test myself by taking on new experiences and new jobs.

Work Experience

Freelance

- EDGE LAB** (App for Parco Archeologico di Ercolano)
(Not public yet)
